To: All Service Providers

RE: eBilling Revised Password Reset System

The purpose of this letter is to notify all service providers of a change in how expired and forgotten passwords are reset in the eBilling program.

The eBilling program has been revised to allow service providers to reset expired or forgotten eBilling passwords. When a user needs to reset an expired or forgotten password, the new password reset process will generate an email, with a custom hyperlink, directing the user to a page where the user may change or reset their password.

Please be aware that users must have a valid email address in their eBilling profile to use the eBilling password reset system. Further, please note that the hyperlink will be valid for 24 hours from the time it is created by the user. If the user does not reset their password within the 24 hour time period, the hyperlink will expire, and the user will need to repeat the process to generate a new custom hyperlink and reset their eBilling password.

NLACRC recommends that service providers verify that all of their users review their eBilling profile to ensure it contains a valid email address so that they may take advantage of this new feature for expired or forgotten passwords.

Enclosed, please find Attachment A, which provides detailed instructions for using the new eBilling password reset system.

If you have questions about the eBilling Password Reset System, please contact your accounts payable staff person for assistance:
