

Helping Optimize Language Acquisition (HOLA): Online Parent Training Intervention

This study will test a new series of brief online learning modules designed to support parents of young children who have challenges with language and social interaction.

Participation in this study will last approximately 12 weeks. Participants will answer questionnaires in-person (3 hours total) and complete six (6) weekly online training modules that provide parents with knowledge and strategies to help their child communicate and develop social skills (30 mins each).

Are you concerned about your toddler's language development?

You will receive a developmental toy for your participation!

Use this link to enroll: https://calstatela.co1.qualtrics.com/jfe/form/SV_b3lm6gWeWCc88le

To participate you must be:

- ☺ 18+ Years old
- ☺ The parent or primary caregiver of a child between 16 and 36 months who uses minimal verbal language
- ☺ Able to read, understand and respond to surveys in English
